Subject: Re: Extend Technology

Thank you for reaching out to EPA and providing the information you discuss below. Hearing from stakeholders regarding the dicamba technology is an important piece of information for the agency to consider as we work towards the upcoming regulatory decision for dicamba.

Mr. Keigwin,

My name is Todd Wachtel and I am a corn and soybean farmer from southern Illinois. I am writing you to ask that you protect our right to use the Extend herbicide technology on our soybeans. Our motto when it comes to weed control is "start clean – stay clean"; but too much rain or not enough rain can derail our plan and that is when the Extend technology really comes in to play for us. Please don't take this tool out of our toolbox.

Thanks for your time.
